

CONSENT TO PARTICIPATE IN THE RESEARCH

We will carry out this research as follows. If you understand the research's purpose and content and can participate in this research, please sign the consent form. Even if you do not participate in the research or do decide to participate but decline in the middle, you will not suffer any disadvantage. We would be pleased if you could attend the research at your will.

* Indicates required question

Significance and purpose of research

In this research, we study different types of factors that influence enjoyment in games. The purpose of the study is to examine the usefulness of each factor.

Participation Period and Specific Method

This experiment will take around 10-15 minutes or less. The experiment contents are as follows. Survey:

1. Give consent.
2. Answer questions.
3. Play a game.
4. Answer questions.

Participation in the study is voluntary, and participants have the right to decline or withdraw from the study.

We hope you understand the purpose of the research and participate, but please decide for yourself whether to participate. You can also ask for an explanation of the purpose of the research, even if you do not participate in the research or decide to participate but decline in the middle, you will not suffer disadvantageous countermeasures. If you quit participation, please let us know what you would like us to do with the collected data so far: we will handle the data accordingly, whether you would like to have it analyzed or abandoned.

Participants will not receive any disadvantageous responses by not agreeing to participate in the research or withdrawing from the research.

You will not receive any disadvantageous responses by not agreeing to participate in the research or withdrawing from the research.

Expected benefits of participating in research. (Including financial benefits)

Participating in this research will not financially benefit you. The data collected from you will help finding factor to influence engagement in games in the future.

Publication of the results, the possibility of feedback (including all cases regardless of individual identifiable/ unidentifiable at the time of research presentation).

The results of this research will be announced as academic achievements, but personal information, such as names, will not be disclosed in papers or presentations and will be announced in a way that prevents identification of participants. Also, if you request it, we will report the questionnaire analysis results and the outline of the research findings to you. Please feel free to send/ask us your requests/questions.

Confidentiality and handling of personal information (range of collaborators handling personal information, etc.)

Data to be used in research will be kept anonymous for all individuals. This data is used only for the period necessary for the research and is under the responsibility of the research director.

Researchers and contact information

The following members will conduct this research.

Supervisor: Prof. Ruck Thawonmas, email: ruck@is.ritsumei.ac.jp

Researcher: Pablo Carrasco Velo, email: gr0797xi@ed.ritsumei.ac.jp

Please contact Pablo Carrasco Velo if you have any questions, requests, or concerns.
